## TECHNICAL SKILLS

React | React Native | Svelte | Vue.js | HTML | CSS | SCSS | Tailwind | JavaScript | TypeScript | Redux | Vite | Node.js | Next.js | Nuxt.js | AWS | Jest | Material UI | Netlify | Netlify CMS | Optimizely | GTM/GA | Phaser.js | Godot | Java

## EXPERIENCE

**Software Engineer**, Yum! Brands – Remote May 2022 – April 2025

- Developed and executed data-driven A/B tests to optimize website and app features for Pizza Hut, increasing revenue by $8 million within three months
- Performed a multi-week review to remove unused components and high-impact feature flags, refactored code to new React standards, and streamlined the repo, reducing merge conflicts and accelerating feature delivery
- Partnered with UX and analytics to run Optimizely experiments (e.g., popular pizza card, quantity picker) and rolled out winners, boosting conversion and satisfaction across millions of users
- Expanded Jest unit tests into full integration suites, reducing production regressions by catching issues during CI
- Guided new hires via pair programming on legacy upsell features, organized regular knowledge-sharing sessions, and documented A/B testing practices, reducing code review comments and speeding up their onboarding
- Fostered remote team cohesion through weekly virtual events, improving collaboration and new-hire engagement

**Front-end Developer**, 14Four – Spokane, Washington March 2021 – May 2022

- Built promotional microsites from scratch for Quaker Back-to-School, Progressive mobile, and Pepsi Super Bowl campaigns, crafting CSS-animated SVGs (dinosaurs, boats, lighthouses) and modern React/Preact components for a polished UX
- Engineered the AT&T Annihilator Cup site, integrating live tournament scores via the Google Sheets API
- Configured GTM analytics across multiple campaigns and sites, setting up event tracking to capture real-time user behavior and drive ongoing design and performance optimizations
- Developed interactive animated ad banners in Preact, importing designer-created animations via JSON and JavaScript to create engaging, responsive ads

**Contract Web Developer**, Ancestry – Remote September 2020 – January 2021

- Updated site content in a secure VM sandbox via HTML/CSS, documented environment constraints, and coordinated with senior engineers to troubleshoot and deploy changes

**Intern Front-end Developer**, Xyngular Corporation – Remote March 2020 – September 2020

- Modernized the rewards page UI by updating React components and CSS styling to a contemporary design, improving user engagement
- Refactored front-end code to align with updated React standards, enhancing maintainability and consistency across the app

**Intern Front-end Developer**, 1-800 Contacts – Draper, Utah January 2020 – March 2020

- Collaborated on bug fixes and features for the Express Exam team, pairing with senior developers to resolve issues from simple text updates to complex flow enhancements
- Co-developed a voice-detection prototype alongside a senior engineer to filter out poor audio inputs, contributing to early feasibility analysis for a new accessibility feature

**Academic Coach**, Neumont College of Computer Science – Salt Lake City, Utah January 2019 – May 2020

- Coached web-development students in HTML/CSS/JavaScript and graded assignments

## EDUCATION

**Neumont College of Computer Science** – BS in Web Development and Design, Summa Cum Laude September 2020
